

BATTLE IS RAGING NEAR NEW CHWANG

Fighting Can Be Seen From the House Tops.

IAPS ARE NEARING THE CITY

Russian Losses in Saturday's Battle Reported to Have Been Over Seven Hundred—Great Excitement Prevails.

Tien Tsin, July 25.—News has reached here that a battle is raging outside of New Chwang. The fighting can be seen from the house tops. In the engagement of Sunday, the Russian losses are reported to have been 700. The Japanese are slowly nearing New Chwang. Great excitement prevails in that city during the battle.

St. Petersburg, July 25.—The reported appearance of Japanese cruisers and transports off Yinkow, coupled with foreign telegrams telling of heavy fighting in that region, bear out the information conveyed in the mutilated dispatch from Tatchekiao that serious movements have been undertaken by the Japanese to gain this coveted base on the northwest coast. It should be pointed out that there is an apparent conflict between the dispatch from Tatchekiao and that received from Liao Yang under date of July 22, saying that all was quiet at Yinkow on that date, but it is possible that owing to the pressure on the telegraph at the front, there may have been a confusion of dates.

Should it develop that the Japanese are now making a determined attack on Yinkow, it would throw fresh light on the heavy land movements of the Japanese to the northwest within the past few days.

Japs Were Successful.

Tien Tsin, July 25.—A report from New Chwang states that Saturday's battle was at Ta Hsiung, six miles distant, and that the Japanese were successful. Many Chinese refugees arriving at New Chwang have reported that nine Japanese gunboats from Port Arthur have arrived at Tah Ting Shan.

CALLS IT FOLK CONSPIRACY

Ed Butler, of St. Louis, Talks at Colorado Springs, About His Last Indictment.

Colorado Springs, Col., July 24.—In an interview Edward Butler, of St. Louis, had the following to say concerning the grand jury indictment found against him for the alleged bribery of a witness:

"It is all a conspiracy for political reasons on the part of Attorney Folk against me and certain prominent bankers and brokers of St. Louis. Immunity was promised to all who would give information that would lead to my being indicted. I am charged with bribing a witness, and I am most certainly not that. I know all about the indictment before I left St. Louis and made arrangements in advance for the furnishing of a bond."

Mr. Butler declares that he is simple with politics. He will remain in Manitou about three weeks.

WRECK ON THE SANTA FE

Express Messenger Sewell, of Kansas City, Killed and Several Other Persons Badly Hurt.

Kansas City, Mo., July 24.—Atchison, Topeka & Santa Fe passenger train No. 6, east-bound, from Colorado, was partially derailed five miles west of Kinsley, Kas., while running at a high rate of speed. Express Messenger Sewell, of Kansas City, was killed. Several other persons were seriously injured. A brake beam on the mail car dropping caused that car, the express car and a smoker to go into the ditch. The other cars remained upright.

A special train bearing physicians went to the scene from Topeka.

Kinsley is 200 miles west of Topeka.

A FAMOUS BUSINESS TEAM

The Pabst Brewing Co.'s Sixteen-Horse Team From Milwaukee At the World's Fair.

St. Louis, July 24.—The famous 16-horse team of the Pabst Brewing Co. of Milwaukee has been entered in competition for prizes in the business horse events at the World's fair. The Pabst team has won prizes in every horse show in the country and is a remarkably beautiful aggregation of pure bred black and gray Percherons. The appointments, wagon, harness and all equipments, with which the horses are shown are extremely handsome and costly.

THEY WANT UNION FOREMEN

Differences Between the New York Marble Cutters and Their 5,000 Employes.

New York, July 24.—Differences between the employers and the Marble Workers' union have arisen here over a demand of the latter for the employment of union foremen. Although the work is being carried on under an arbitration agreement a general lockout is threatened. Five thousand men are affected.

Killed by Falling Slate.

Duquoin, Ill., July 24.—Charles Apolino, an Italian miner employed in the Jupiter No. 1 mine here, was instantly killed by falling slate. His back was completely broken, the weight of the slate being seven tons.

Gen. Booth and Queen Alexandra.

London, July 24.—Gen. Booth, commander-in-chief of the Salvation Army, was received in audience by Queen Alexandra at Buckingham palace. The queen was most cordial and talked with him for more than half an hour.

TEXTILE WORKERS' STRIKE

First Test of Strength Will Come Monday.

All Hope of a Peaceful Settlement Has Now Been Abandoned on Both Sides.

Fall River, Mass., July 25.—With hope of a peaceful settlement abandoned, both sides in the pending industrial trouble here await with dogged determination the coming of Monday, and the first test of strength between a little group of manufacturers representing a combined capital of \$25,000,000 on one side and more than 25,000 cotton mill operatives on the other.

The mill gates will be opened at the usual time Monday morning, and the operatives will be given an opportunity to go to work under a wage reduction of 12 1/2 per cent. If an insufficient number responds, the mills will be closed for an indefinite period. The strike leaders were of the opinion that there would not be enough operatives applying for work throughout the entire city to run even one mill, to say nothing of those that are more or less affected by the strike order.

The manufacturers claim that the 2,000 men who voted to strike do not represent the sentiment of the great body of cotton mill employees. They give the total number of operatives on their payroll as 25,000. This of course does not include the employees at the independent mills of M. D. C. Borden, which are not involved. The talk on the streets indicated that the feeling against the manufacturers is quite as bitter among the non-union operatives as it is among those who are affiliated with the labor organizations.

John Golden, president of the United Textile Workers of America, the leader of the strike, has cautioned the operatives not to go near the mills Monday. Many wild threats have been made by an unaffiliated class of workers, but violence is not expected.

The only possible break in the ranks of the strikers is looked for at the Borden city mills. These mills, which normally employ 775 operatives, have not been operated on full time for two months, and the people who were employed there are reported desperate for want.

Regarding the non-union element, the strike leaders believe that if it can be demonstrated for two weeks that the non-union operatives can live on strike benefits as well as if not better than on the wage paid by the mills, the strike can be prolonged indefinitely. The police have made only little preparations for handling the crowds of strikers, but officers will be stationed at the mill gates.

Several small stores, patronized chiefly by the operatives, have been obliged to close, owing to the abrupt falling off of trade, and on all sides an alarming decrease in business has followed the issuance of the strike order.

IS EXTRAVAGANT IN PRAISE

One Experienced in Expositions Talks of the Wonderful Displays at the World's Fair.

St. Louis, July 25.—Col. Ferdinand W. Peck, of Chicago, commissioner general of the United States to the Paris exposition, who has just concluded a visit to the World's fair, is extravagant in his praise of the completeness and extent of the exposition. Especially was he surprised at the extensive displays in the Palace of Agriculture.

"No such presentation of agricultural exhibits has ever been made in the world," said Col. Peck in discussing what the Palace of Agriculture contained. "I have attended all of the expositions of any importance that have been given in this country and Europe and the agricultural exhibits, even in those where agriculture was made a specialty, did not even approximate what may be seen in the department of agriculture here at the World's fair. I recall only two or three exhibits at the other expositions that I have attended that have measured up to the average of the exhibits in the Palace of Agriculture. There are scores above the average."

"The foreign countries have contributed more largely to this branch of exposition work than ever before, and their exhibits are of incalculable value in many ways. Whoever is interested in agricultural science in any way should see the World's fair agricultural exhibit. I do not believe any such valuable display will ever again be gotten together."

Will Not Be Transferred.

Rome, July 25.—The Giornale d'Italia says that it is not likely that Monsignor Falconio, the apostolic delegate in the United States, will be transferred to Manila, to replace the late Mgr. Guidi.

King Christian Not Seriously Ill.

Copenhagen, July 25.—It now transpires that the illness of King Christian is not serious. He left Schwerin Sunday for Copenhagen.

Notification of Roosevelt.

Oyster Bay, L. I., July 25.—The arrangements have been made for the notification of Theodore Roosevelt of his nomination for the presidency by the republican party. The ceremony will take place on Wednesday, the 27th inst., at 12:30 p. m. Following custom, the notification will be at Mr. Roosevelt's home, Sangamore Hill.

Soldiers' Reunion at Chandlerville.

Virginia, Ill., July 25.—The annual Cass county soldiers' reunion and fish fry will be held at Chandlerville Ill., Wednesday, August 17.

Senator Vest Much Weaker.

Sweet Springs, Mo., July 25.—Senator Vest's condition Sunday night was much weaker, the rally of Saturday having been only temporary. Mr. Vest's son and daughter will not return to St. Louis as planned, but will remain near the bedside.

Old Telegraph Operator Dead.

Cornwall, N. Y., July 25.—James Kain, the oldest telegraph operator on the Erie railroad, is dead at Painted Post, N. Y., after five years of continuous service.

A CHARMING SHADE TREE.

Norway Maple Is Beautiful and Should Have More Recognition in the West.

Norway maple (Acer platanoides) has been for many years a favorite for embellishing parks, boulevards and avenues in this country and in Europe. It is found from Norway to Italy, and in central and southern Russia. It was introduced into Britain in 1833, and later imported into the United States, and has been widely distributed in states north of Maryland.

It thrives in almost any soil, from sandy to rocky and clay, where the location is satisfactory for any tree, even in the paved streets of smoky cities, though its spreading habit of growth makes it undesirable for narrow city streets. The whole beauty of the tree

LEAVES OF NORWAY MAPLE.

is developed where it can spread naturally—horizontally in all directions; it will grow to 70 feet high, and spread to a circumference greater than the height. The foliage appears early in the spring, and is dense and rich in green. The tree casts a shadow in the first week of hot weather, and appears in full leaf when the elm's leaves are not half grown. At this time the blossoms, borne in racemes of yellow, attract attention.

The Norway maple, while one of the first to appear in full leaf, is one of the last to part with its foliage in the fall, and the shade cast by their yellowish-green leaves is refreshing under a hot October sun.

There are three varieties of the Norway maple, of strong habit, that make very beautiful, large-sized lawn trees. Good effect is produced by permitting them to branch very low, so the branches may touch the ground. The three varieties referred to are:

Acer platanoides, var. Schwedleri—A purple-leaved variety, with dark-red branches and scarlet twigs and leaves on the young spring growth; leaves very large and very dark-brown after midsummer.

A. p. var. Reitenbachii—Similar to the preceding, with less reddish-purple in the spring, but brighter and dark blood-red in summer.

A. p. var. laciniata—This variety has the habit of growth of its species, except that the twigs are longer and more willow-like; color lighter or yellowish green; leaves deeply cut and attractive.

The accompanying cut is botanically correct. If a leaf stalk is cut off during the growing season, a milk-white sap will exude, and this may be regarded as one way of identifying the Acer platanoides from other species of maple.—George G. Atwood, in Country Gentleman.

GIVE THE BIRDS A SHOW.

After All Is Said and Done They Are About the Best Friend of the Fruit Grower.

The birds are frequently a great nuisance to the man that grows a little fruit. With the man that grows a great deal of fruit there is nothing to complain of. The towns and cities in some of our states have encouraged the man who has two or three raspberry, currant or blackberry bushes to get any fruit at all. The writer has a small plantation of raspberries, but finally dug it out, as the birds every year took all the fruit. He has other small fruit in larger quantities, and keeps this because he has enough so that the birds can take some and there will still be a good margin left for the cultivator. We have heard men rage against the birds. One man says that if there is any one bird that should be shot it is the robin, and he practices shooting robins on his farm because they attack his fruit. Now we believe in the birds. We cannot expect to have something for nothing, and the benefits the birds bring have to be paid for by a salary of fruit. The way for a man to escape their ravages largely is to grow enough of one kind of fruit to have enough left for himself after having lost some by the ravages of the birds. Taking all in all the fruit grower has the best of it. He is mistaken in thinking that he is the loser. He sees the fruit the birds have taken, but he is not able to find out the number of the predatory insects that have been consumed by the birds. If a man has a small lot of fruit, the only way to save it will be to cover it; and in that case the work will not be laborious. If his plantation is large he will never discover the loss.—Farmers' Review.

Walnut Tree Plantation.

Ten acres of walnut trees have just been planted on the Indiana forestry reservation by Secretary Freeman, of the state board of forestry, which are expected to develop into valuable property. In the planting of the seeds the utmost care was taken that they would have the best chance to develop. In preparing the soil Secretary Freeman broke the ground with a sort of heavy sled made of beams and iron, to which was attached a sharp steel plow. The walnuts were buried in sand last fall, to permit the outside hull to decay, and thus facilitate the growth when the seeds were planted permanently. They are expected to be up in a short time, while had they been planted without any preparation it would have been two years before the sprouts appeared above the surface.—Indianapolis News.

Doubtful of His Own Honesty.

"Is Sidney such a hopeless cynic?" "Yes, he is. No faith even in himself, poor fellow. You can't lend Sidney your umbrella to save your life."—Indianapolis Journal.

English Women Toppers.

The deaths of women directly arising from intemperance have increased, said the bishop of Croydon, England, by 150 per cent. since 1875, as shown by the registrar-general's returns.

SEEKING ETERNAL YOUTH.

French Scientist Experimenting to Produce Magic Philtre to Kill Old Age Microbe.

Why grow old? One has only to capture the microbe which produces this condition and treat it with the proper medicament and one may vegetate in eternal youth through countless aeons. At any rate, this is the possibility put forward by Prof. Metchnikoff, of the Pasteur institute, Paris, says a recent report.

Prof. Metchnikoff's work on the battle between microbes and phagocytes has long been a classic. It is an extension of this work which has led him to the opinion that old age is a chronic disease and may be cured just like any other. Only the remedy has not yet been found, but if the professor's conclusions are sound there should be no great difficulty in discovering the "elixir vitae." A recent lecture on the subject given by the professor produced something like a sensation in Paris, where the art of trying to look young in spite of one's years is almost universally practiced. If to seem young is good, to be young is better. That the magic philtre which is to work this miracle is in a fair way of being discovered may be now taken for granted, and the professor points out the way.

In a recent conversation Prof. Metchnikoff enlarged upon the subject of his lecture. Old age, both in man and beast, the professor said, was produced by certain physiological conditions, the result of overproduction of a certain kind of cell known as macrophages. Innocent, even beneficent in small numbers, they become injurious when their number increases beyond a certain point.

"I have," continued the professor, "been for many years closely investigating the problem of old age, and the reason that I took up this most interesting subject was that science merely contented itself with accepting the existing state of things without trying to retard or prevent the advance of senility."

"As a matter of fact, old age is the result of a battle between the good and the bad elements of the human organism; a fight which invariably terminates with a victory for the latter. When I use the word 'battle' I am not speaking metaphorically, but I really mean an active struggle for supremacy. There are in our bodies many cells which have independent motions and they are capable of devouring all kinds of solid bodies, hence the name of phagocytes or voracious cells."

"These phagocytes fill an important role in our organism, and it is they which surround and devour any intruder who might injure our health; in fact, they are the police who safeguard our systems. Take, for instance, the case of a man stricken in apoplexy; the blood is temporarily paralyzed; here the work of the phagocytes at once begins. They surround the blood clot and devour it and as soon as the brain is relieved from this pressure the natural functions of the body are resumed and the patient is cured, the cure in this case being entirely the work of the phagocytes."

"Now, we have divided these 'phagocytes' into two distinct classes, the 'microphages' and the 'macrophages,' and the latter are distinctly responsible for senile decay."

"The invasion of the tissues by these macrophages is so general in old age that one is necessarily compelled to attach great importance to it, as, for instance, in the brains of old men and old animals we find that the brain cells are entirely surrounded and destroyed by 'macrophages.'"

"My theory is that in old age all the better elements of our organism are destroyed by these macrophages, which have increased and multiplied too fast, and my conviction of the truth of this statement has been more than verified by personal observation."

"To determine more precisely the functions of these phagocytes, I closely studied the action of the hair, which on turning gray gives the first visible sign of old age. I found that colored hair was full of minute particles of pigment. At a given moment the cells of the hair become agitated, they come out of their torpor and devour all the pigment in their reach. These cells, which are, after all, another variety of 'macrophages' called 'pigmentophages,' or, better still, 'chromophages,' are filled with colored particles, and, becoming active, proceed to move, some traveling through the body and some leaving the system. In this day these 'chromophages' take with them the pigments of the hair, which necessarily deprived of these, turns white."

"Man has a distinct aversion to growing old, feeling instinctively that in old age there is something abnormal. Now we give medicine to allay pain, why should we not discover some remedy for old age, which, after all, is a chronic disease?"

And why not? The macrophage has to be got under, and the man who will invent a good and reliable macrophage killer will have become immortal in more than one sense.

In Praise for Knitting.

Knitting is declared by specialists to be the treatment of rheumatism to be a most helpful exercise for hands liable to become stiff from the complaint, and it is being prescribed by physicians because of its efficacy. For persons liable to cramp, paralysis, or any other affection of the fingers of that character, knitting is regarded as a most beneficial exercise. Besides the simple work is said to be an excellent diversion for the nerves, and is recommended to women suffering from insomnia and depression.

English Women Toppers.

The deaths of women directly arising from intemperance have increased, said the bishop of Croydon, England, by 150 per cent. since 1875, as shown by the registrar-general's returns.

GETTING A PUFF OF FAME.

At Times It Is a Face and Then Again a Name That Brings the Puff.

Justice Brewer is from Kansas, and his state is justly proud of him, says the Kansas City Journal. Soon after his elevation to the supreme bench a cigar manufacturer in Topeka dedicated a ten-cent "domestic" cigar to the jurist, named it "Our Justice," and on the cover of each box pasted a portrait of Mr. Brewer.

A few years ago the justice was in Topeka on a business trip. The hotel clerk recognized him, and the negro bell boy, although he had no idea who the newcomer was, knew from the way he was ordered about that the patron was of some consequence. Going up in the elevator the negro stared constantly at the tall, dignified man.

Suddenly the black face was wreathed in smiles, and he said: "See me, boss, but ain't you de gentleman dat invented dem 'Quah Justice' cigars?"

This reminds one of the man who was recalling famous persons who "parted their names in the middle."

"And then," he said, "there is 'E. Pluribus Unum,' the man that makes the 'bass drums.'"

SCOLDING SET TO MUSIC.

And It Took the Wagnerian Brand to Do the Jawing Full Justice.

In one of the big Hundred and Twenty-fifth street beer gardens a brass band was playing what purported to be a Wagnerian selection with positively deafening effect, relates the New York Times. The good-natured people around the tables had wisely abandoned all effort at conversation.

Not so with one woman, a shrewish-looking person, who was leaning over a table shaking her finger at her husband and doing her best to make him hear the abuse that she was evidently hurling at him. Suddenly, with one grand blast, the music stopped, and the woman's voice, pitched in a veritable scream, was heard.

"You bald-headed, sour-faced idiot, I'll checked by her own strident tones she looked about her in consternation. Not so the husband. He was called to abuse. Picking up his stein he looked at his wife and growled:

"Shut up till the band starts again."

Nothing Surprising.

Mr. Nervey—I suppose you know the object of my call, sir. To be brief, I want to marry your daughter.

Mr. Roxley—But? What? I'm surprised that you should think of such a thing. The idea!

"Nonsense! You're prejudiced against the girl. She's all right."—Philadelphia Press.

Proved Beyond a Doubt.

Middlesex, N. Y., July 25.—(Special).—That Rheumatism is a disease that has been proved beyond a doubt by Mrs. Betsey A. Clawson, well known here. That Mrs. Clawson had Rheumatism and had it bad all her acquaintance knew. They also knew she is now cured. Dodd's Kidney Pills did it. Mrs. Clawson tells the story of her cure as follows:

"I was an invalid for most five years caused by inflammatory Rheumatism, helpless two-thirds of the time. The first year I could not do as much as a baby could do; then I rallied a little bit and then a relapse. Then a year ago the gout set in my hands and feet. I suffered untold agony and in August, 1903, when my husband died I could not ride to the grave."

"I only took two boxes of Dodd's Kidney Pills and in two weeks I could walk on myself and saw my own wood. I dug my own potatoes and gathered my own garden last fall. Dodd's Kidney Pills cured me."

Rheumatism is caused by uric acid in the blood. Dodd's Kidney Pills put the Kidneys in shape to take all the uric acid out of the blood.

Overdid It.

Hewson—That man Scalper has a natural talent toward speculation.

Hume—Yes, and the last time he bent too far and went broke.—Town Topics.

Snake Into Your Shoes.

Allen's Foot-Ease, it cures corns, swollen, smarting, aching feet. Makes new shoes easy. Sold by all Druggists and Shoe Stores. Don't accept any substitute. Sample FREE. Address A. S. Olmsted, Le Roy, N. Y.
